

Options with taste!

10 Year Limited Warranty

Option Kitchen warrants their cabinet box construction, drawer boxes, roll out's and finishing process against defective materials and workmanship for a period of ten years. However all of our hinges and drawer glides have a lifetime warranty. This warranty is limited to the original purchaser.

Option Kitchen Cabinetry Care

Option Kitchen's products are designed to hold up to your everyday use. No special or delicate care is required. Just following these few simple steps will help to keep your kitchen looking great for many years to come.

- ◆ **Darkening or Yellowing:** You must remember that all woods will naturally darken with age. There is no known preventative for this process and it is considered and accepted as part of woods natural character. Some species such as Red birch & Cherry will darken more and faster than other woods. The major cause of this process is sunlight, which will speed up this process, however will also help to bring out the natural rich patina of the wood.
- ◆ **Expansion & Contraction:** Since wood is a naturally porous material, it will naturally absorb and release moisture causing unavoidable shrinking & swelling. This can result in dimensional changes in larger pieces, which may result in minor warping. These dimensional changes are often associated with seasonal change and will usually, given the chance, return to normal after one full season change. These changes are one of the natural characteristics of wood and should not be considered as a defect in material or workmanship.
- ◆ **Moisture & Cleaning:** Even though Option Kitchen's finish is highly moisture resistant you should still try to avoid any prolonged contact with moisture. Wipe up any spills or splashes quickly with a clean soft cloth. For your day to day cleaning you should use a damp cloth with water only, or for those really tough cleaning jobs use a mild soap and water solution. Immediately after any cleaning you should wipe dry the surface with a soft cloth. **Do not use any type of cleaners such as Goof off or Windex as they will break down the finish properties and could cause peeling of the finish, which will not be covered by our warranty.**
- ◆ **Surface care:** It is not necessary or recommended to apply furniture wax or polish to your kitchen cabinets. Our topcoats are formulated to provide a pleasant sheen without waxing. Simply wipe with a slightly damp cloth to restore the like new appearance.
- ◆ **Drawer boxes & Interiors:** Option Kitchen's Dovetail drawer boxes get the same tough finish as our exteriors. You should use the same cleaning guidelines. Our drawer glides & hinges need no lubrication or maintenance. Our cabinet interiors have a melamine surface, which will clean up quite nicely with a mild soap & water solution. With our finished interiors you should follow the same care guidelines as mentioned earlier.
- ◆ **Surface Damage:** We all know that the occasional nick or scratch is inevitable. You should contact your Certified Option Kitchen dealer to inquire about our touch up kits. We recommend purchasing a kit now and keeping it in a safe place for your future use.
